

Ethan J. Kim

New York, NY

(516) 778-0551 | Email: ejk252@cornell.edu | ethankkimm.wixsite.com/ethan-kim-engineerin

EDUCATION

Cornell University: College of Engineering

Expected May 2027

- GPA: 3.65
- Major: Mechanical Engineering
- Relevant Coursework: Mechatronics, Heat Transfer, Mechanical Design, Fluid Mechanics

Jericho High School

June 2023

- GPA: 4.24 weighted, 3.97 unweighted | SAT: 1510 (790 Math | 720 English)

RELEVANT EXPERIENCE

Amazon Operations

June 2026-Present

Area Manager Intern

- Led a team of 50+ associates in Amazon Sort Operations, achieving daily throughput of 360,000+ units while maintaining productivity, safety, and quality standards.
- Built a Tampermonkey automation tool that enabled real-time tracking of downed stations, improving manager coordination and reducing operational startup time.
- Conducted data-driven 1:1 performance reviews with associates, identifying productivity gaps and implementing coaching plans to improve individual performance.
- Analyzed operational metrics and collaborated with cross-functional managers to resolve process bottlenecks, maximizing throughput and minimizing downtime.
- Directed labor allocation and workflow execution across the sorting department to ensure on-time processing of high-volume customer shipments.

Co-generation Group

January 2025-Present

Undergraduate Researcher

- Researched and experimented solutions to increase the heat differential of thermoelectric generators that convert solar energy to power for a heat and electricity cogeneration oven.
- Synthesized and characterized aerogel-based insulation materials using experimental testing to improve thermal resistance for thermoelectric cogeneration systems.
- Utilized Fusion 360 and Ansys Workbench to design and test physical modifications to the chassis

Cornell GreenClub Project Team

September 2024-Present

Glimpse Hardware Lead

- Led hardware development of an IoT food waste measurement system for local restaurants, designing CAD models, electronic integration, and rapid prototypes.
- Learned about sustainable practices and the methods of easily mass-producible product design

Tufts Pre-College Program

July 2022

- Built Python skills through an introduction to flask servers in engineering design coursework
- Collaborated, brainstormed, and delegated tasks with a student team to build an electromagnetic door lock using two Raspberry Pi computers, 3D-printing using OnShape, and woodworking

LEADERSHIP EXPERIENCE

Emmaus Road Church

January 2024-Present

Prayer Team Lead

- Collaborated with fellow team members to create slides and prayer topics for prayer events
- Utilized public speaking skills while leading weekly church-wide prayer events and meetings

Infinite Challenge

October 2019-May 2023

Captain & Member

- Elected to lead student-run volunteer group under partnership with the American Cancer Society
- Headed a team of 20+ students toward the goal of raising community awareness by organizing walk-a-thons, merchandise sales, and golf outings to fundraise and support cancer research
- Served over 330 hours and raised \$7000 to donate to ACS over the span of two years

SKILLS/INTERESTS

- Skills: CAD, 3D Printing, Arduino, Ansys, Java, Python, Matlab, Microsoft Office, Power Tools
- Interests: Boxing, Mixed Martial Arts, Volleyball, Basketball, Movies, Philosophy, Theology
